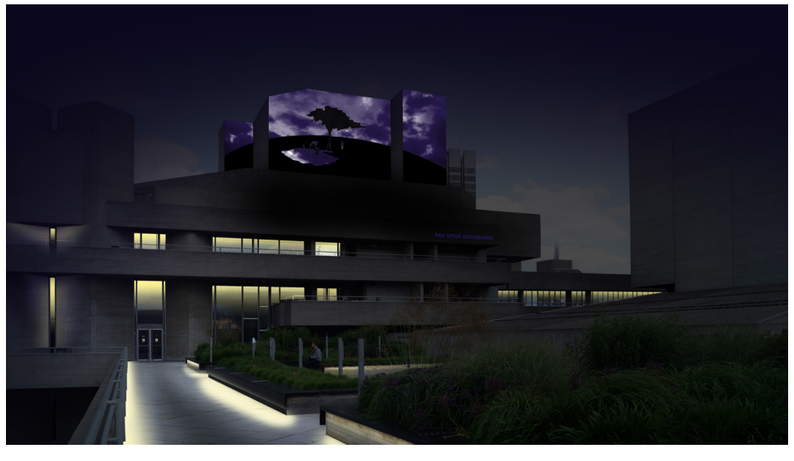
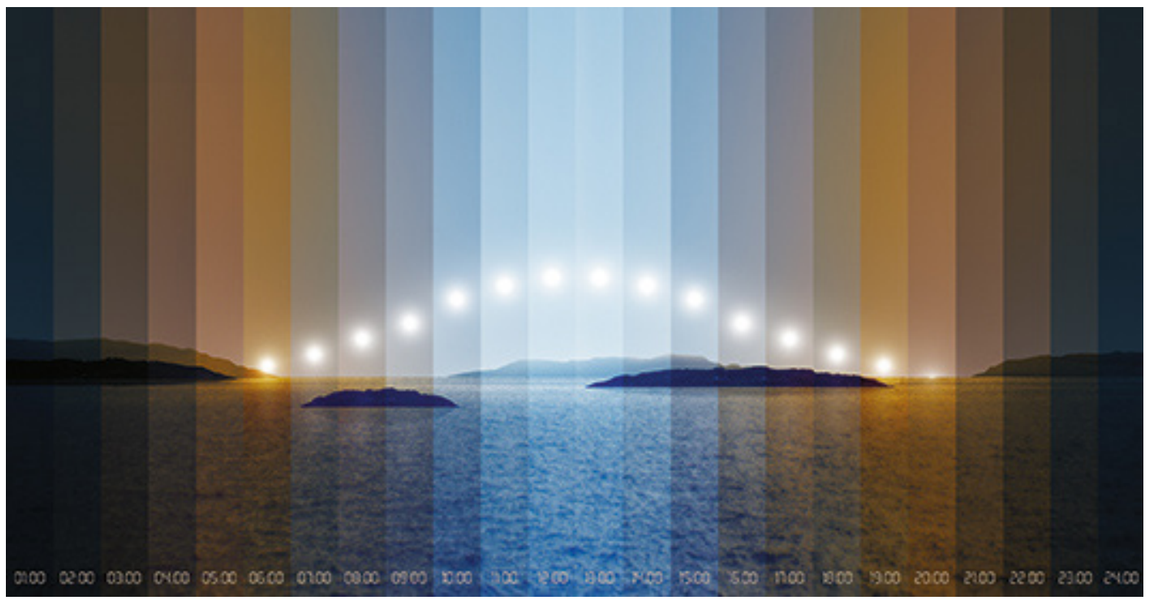
internal world

a silhouette of a small park scene in a big city. two figures. a whole world inside each. an unlikely connection.
a big sky over the city. moving, passing by, flowing....seamlessly changing, often unnoticed.
a big tree canopy offering its shade. offering a view inside.





dynamic effects

- 2 minute sequence
- colour mixing CMY
- gobo animation wheel - variable angle, speed and direction
- dimming

Note:
Ideally we would like to discuss the colour and animation effects in more detail and test them before the projection event, if shortlisted for the final round.
We prefer not to specify Photoshop CMY colour references at this stage. We do not think this would be reliable as colours differ in appearance on computer screens, and when printed or projected. We have included reference images and descriptions.

animation wheel

- angle - horizontal
- direction - left to right
- speed - very subtle slow motion

colour and dimming

Silhouette image background to simulate natural day-night cycle from early sunrise to late night sky, seamlessly changing white colour temperature, colour and light intensity.

1. Sunrise – warm white 3000K, low intensity
2. Early morning – neutral white 4000K, medium intensity
3. Morning – cool white 5000K, medium intensity
4. Midday – cool white 6500K, high intensity
5. Early afternoon – neutral white 4000K, high intensity
6. Late afternoon – warm white 3000K, high intensity
7. Evening – warm white 2500K, medium intensity
8. Sunset - deep orange, medium intensity
9. Late night – deep blue, low intensity

dynamic effects

1. Sunrise

3. Morning

4. Midday

7. Evening

8. Sunset

9. Late night
